# DuoTherm™ Awning/Casement Window - 373 System

Designed for thermal efficiency and style, the DuoTherm™ awning/casement window is the perfect solution when energy efficiency and a sleek stylish look is desired. The window can incorporate up to 24mm double glazing and there is virtually no air infiltration that would otherwise lead to energy losses. Excellent sound reduction performance is another feature of this window.

The DuoTherm™ awning/casement window is designed to be incorporated into Lidco's vast array of framing systems such that side lights, high lights and low lights can be seamlessly added.

## Better Designed

- + Low air infiltration – suitable for air-conditioned buildings
- + Accepts up to 10mm single glazing or up to 24mm double glazing
- + Sash can be used in commercial framing applications
- + Flush external look for improved aesthetics
- + Chain winder sits flush on the sill or transom
- + 25mm low profile, clean modern looking transom and mullion
- + Option of chain winder or cam handles

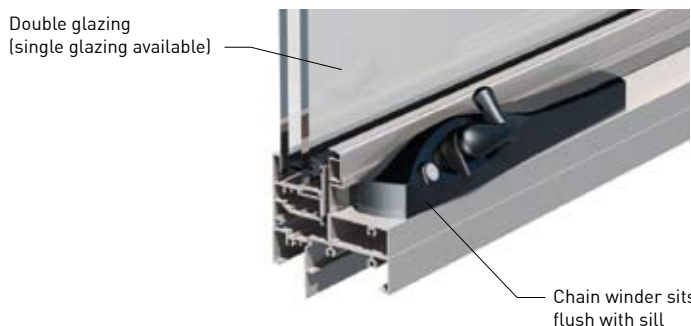

Maximum Panel Height <sup>†</sup>	1800mm
Maximum Panel Width <sup>†</sup>	1210mm
Maximum Glass Thickness	≤ 24mm

<sup>†</sup>Dependant on wind loadings and glass thickness, refer to Lidco limitation tables

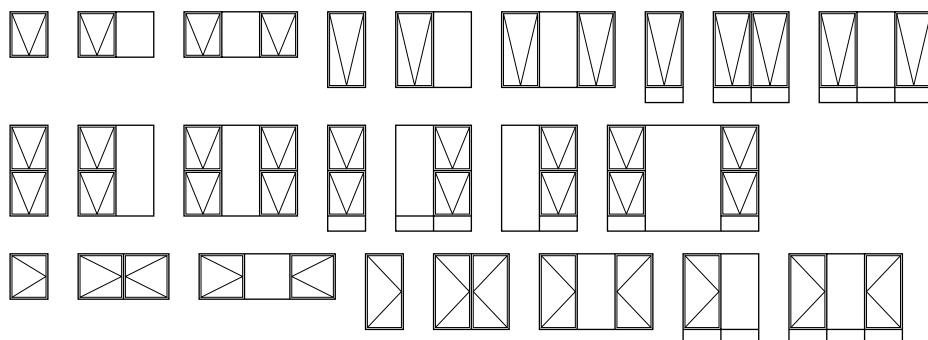

## Hardware

### Awning Window Chain Winder Option

- + Compact fold-over handle
- + Rated for use on maximum 32kg windows
- + Solid all metal construction for strength and durability
- + Lockable for added security
- + Flyscreen option
